ACTIVE SUBSTANCES

GEHWOL FUSSKRAFT Soft Feet products contain deep-acting hyaluron and premium active ingredients from nature's garden. They support the natural skin functions and contribute in various ways to keeping the feet healthy and well groomed.

ALOE VERA

This medicinal plant has been in use for centuries and contains a wide variety of vitamins and minerals. Aloe Vera gel moisturizes and has anti-inflammatory effects.

BAMBOO

Finely ground bamboo powder gently removes skin scales.

POMEGRANATE

contains bioactive substances, especially polyphenols and flavonoids, which nourish the skin and have anti-inflammatory and antioxidant effects.

HONEY

Honey extract soothes the skin and regulates its moisture content.

HYALURON

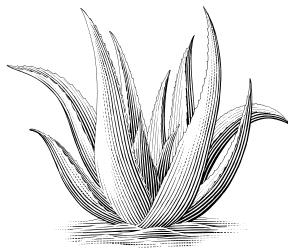

Hyaluron can be absorbed by the skin in a special, deep-acting molecular size, allowing it to support skin regeneration and strengthen the skin's immune defences.

ALMOND

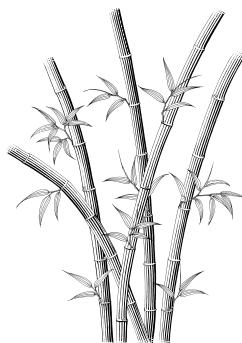

Almond oil is also suitable for sensitive skin. It contains about 90% unsaturated fatty acids, of which 30% is linoleic acid. This excellent active substance carrier easily penetrates the skin and soothes irritation.

WATER LILY

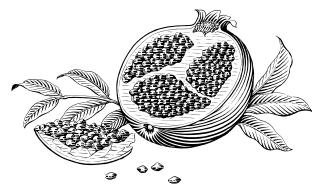

Water lily extract contains flavonoids and tannins which have mild astringent and skin smoothing effects .

SOFT FEET SCRUB

Bamboo + Jojoba

For all skin types

Enjoy an incomparably smooth skin sensation on the feet and legs with the **Soft Feet Scrub** based on natural bamboo granulate and jojoba wax.

- Select sugar crystals gently remove loose skin cells and make it easier for dry skin scales to detach
- Premium avocado oil and honey extract supply the skin with premium care ingredients
- Antioxidant vitamin E protects the skin and prevents premature skin aging
- A gentle massage activates the skin circulation, stimulates cell renewal, optimally prepares the skin for subsequent care and improves absorption of premium active substances
- Mild scent
